100 Gram Hanks

2/18 Lace-approx. 1,120 yds.

4/8 Worsted- approx. 248 yds.

50 Gram Hanks

2/18 Lace- approx. 560 yds.

4/8 Worsted- approx. 124 yds.

Because wool and silk accept dyes differently, the fabric made from this yarn may have a slightly "tweedy" look in some shades.

Due to the difficulties inherent in dyeing wool-silk, some shades may be less resistant to fading in light and water than 100% wool. For this reason, we recommend that wool-silk garments not be exposed to natural or artificial light for prolonged periods and that they be dry-cleaned only. We cannot be held responsible for damages incurred as a result of any other cleaning or finishing method. *Weavers, please take note.*

We are proud to present the JaggerSpun Collection of fine quality coned yarns.

The Jagger name has been synonymous with high quality worsted spun yarns since the 1880's when Uriah Jagger arrived from England and established a worsted spinning operation in the Mousam Valley of southern Maine. The traditions that he began have remained in the family and are continued today.

JaggerSpun, a division of Jagger Brothers, offers you a unique collection of 100% worsted spun wool and wool-silk yarns that have been developed and manufactured by us. The JaggerSpun Collection consists of diverse product groups, in a variety of textures and blends, and an eye pleasing array of colors. All 100% natural.

We stand behind our product. We guarantee you'll be satisfied. Naturally.
